

HYDRA DeGreen

Outdoor Green Remover All Hard & Soft Surfaces

HYDRA®

Features & Advantages

- ◆ **Hydra DeGreen** contains powerful detergents and sequestrants that rapidly dissolve and solubilise outdoor contamination from all hard and soft surfaces.
- ◆ Cleans and removes the many dangerous slippery hard surfaces in gardens and driveways.
- ◆ Use on Hard Surfaces i.e., patios, decking, fencing, garden furniture, AstroTurf etc.
- ◆ Use on Soft Surfaces i.e. sunshades, cushions, protective covers etc.
- ◆ Cleaned surfaces have an invisible protective finish which lasts for up to 6 months.
- ◆ Easy to apply, the made-up solution is sprayed or poured onto the surface to be cleaned, no need to rinse, rain will simply wash it off.

Description

Hydra DeGreen

Hydra DeGreen is the easy way to clean all outdoor surfaces from mould, green fungus, moss, lichen, algae etc.

There is no scrubbing, no pressure washing or rinsing required. Simply apply and walk away.

Multi Purpose

Hydra DeGreen works on both hard and soft outdoor surfaces, tackling outdoor residue and dirt build up, such as moss, mould and algae.

Cleans hard surfaces such as driveways, patios, decking, pathways, fencings, roofs, sheds, garden furniture, greenhouses, terracotta pots, garden statues, UPVC windows, caravans, motor homes, boats etc.

Cleans soft surfaces such as protective covers, cushions, sunshades, Astroturf etc.

It can be used on all materials such as wood, metal, plastic, textile, stone, brick, glass etc.

Results of using **Hydra DeGreen** on wood (Wooden fences in this example) show beautiful results **after just 2 days** from application.

Please see first images before application, and second images after leaving **Hydra DeGreen** to work for **48 hours**.

The Solution

NO DISCOLOURATION

Hydra DeGreen does not contain bleach or acid, therefore it will not damage or discolour treated surfaces.

SAFE

Biodegradable, no bleach, or acid, safe on a wide range of surfaces, if children and pets are present, ensure surface is dry before reintroducing them to the treated area.

MAXIMUM ECONOMY

Normal Use: Highly concentrated for maximum economy. 1 litre makes 10 litres working solution, 5 litres make 50 litres working solution.

Heavy Contamination: 1 litre makes 5 litres working solution, 5 litres make 25 litres working solution.

Coverage: 25 litre working solution up to 400²m.

Above is the result of using **Hydra DeGreen** on outside gate handle.

First image is showing handle covered in green fungus. Second image is just after first application. Third image, most important one, is showing that same handle after 4 days of application of **Hydra DeGreen**. As you can see, green fungus is completely gone - there was no scrubbing or brushing involved. Just spraying the solution on and leaving the product to do its job.

How To Use

Apply diluted solution to area to be cleaned through a watering can with rose or spray bar or pump-up sprayer. Use on a dry day when no rain is expected for at least 5-6 hours.

Do not apply in strong sunlight. In summer months use late afternoon when sunlight is less intense.

Results will start to be seen within 2-3 days.

Do not rinse off, no need for scrubbing or pressure washing.

HOW TO CLEAN OUTDOOR CUSHIONS

The best way to clean outdoor cushions is to brush the surface first to remove any loose dirt, then when cleaning outdoor cushions, spray solution over all surfaces and leave to dry, no need to rinse.

HOW TO CLEAN WOODEN GARDEN FURNITURE

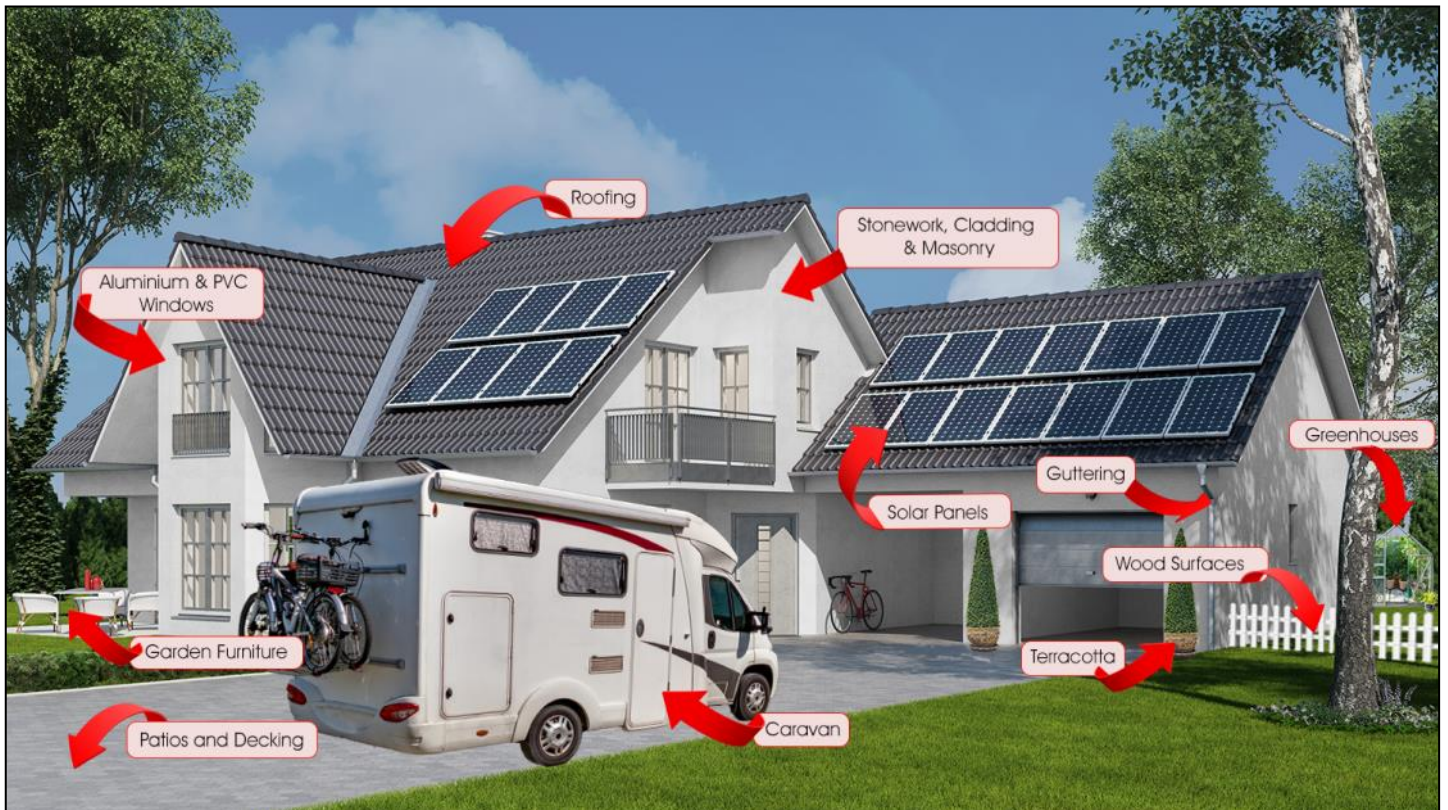

The best way to clean wooden garden furniture is to ensure that all loose debris has been brushed off and spray all surfaces with a diluted solution of **Hydra DeGreen**.

HOW TO CLEAN DECKING

Brush away loose leaves, moss, and debris, then apply diluted solution to surface by sprayer or watering can and leave to dry, will also act as a composite deck cleaner.

Where to Use Hydra DeGreen

Use Hydra DeGreen on all materials such as metal, stone, brick, plastic, wood, textile, furnishing etc.

Laboratory Facilities

Hydra International Ltd.'s Research & Development Laboratories are a hub of activity where new products are developed and formulated. We have working relationships with our raw material suppliers, many of these suppliers are major world-wide chemical manufacturers with their own development laboratories.

As a company we are well known in the chemical industry for being receptive to cutting edge new chemicals which can be incorporated into our products to achieve performance advantages. An important part of the International Standards that we hold is that of constant improvement. We show that we have achieved this at every independent audit.
